Coastal & Civil Protection Solutions

BLUEMONT

Rock Bags

- Applications:**
- Ports & Coastal.
 - Offshore & Subsea.
 - Scour Protection.
 - Salvage.
 - Rivers & waterways.
 - Roadworks & repair.
 - Bridges.
 - Rails.

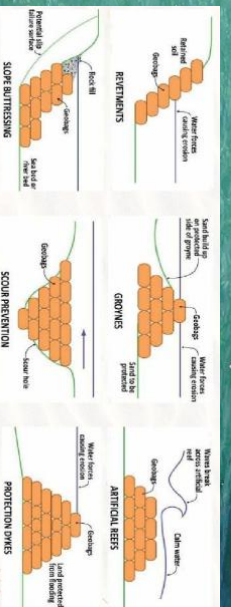

ADJUSTMENT OF UNEVEN SEABEDS

The Rock Bags reduce water flow velocity as water energy is absorbed into the space between the rocks. When installed under water, the spaces between the rocks provide a habitat for aquatic life.

- Features:**
- Up to 50 years life span.
 - 1.3 M Rock Bags installed worldwide.
 - 100% made of recycled materials.
 - 2, 4 and 8 tons Rock Bags.
